

Mission Hospital- DRESSING CHANGE ORDERS

Following a wound care consult:

- ❑ The wound care nurse will enter a dressing change order
 - This will fire a task to change the dressing
 - The bedside RN should perform the dressing change per the orders and document the dressing change in IView
 - Orders are located in the “Treatments/Nursing” section of the orders tab in the EMR
- ❑ *Dressing changes should be done by the bedside RN unless otherwise indicated in the order*
- ❑ A wound care nurse may see the patient periodically to monitor progress
 - Wound Care will typically complete the dressing change on that day
- ❑ For questions about dressing change orders use iMobile:
 - Search contacts for “acute wound” to contact the wound care charge nurse
 - You can also look in iMobile to see if there is a wound care nurse assigned
