HCA EDUCATIONAL EVENT:
Electrotherapy over Acupoints for Stroke Recovery

HCA Healthcare®

WEDNESDAY, NOV 4, 2026
5-6 PM (CT)
Virtual Webinar

Course Description

This intermediate level course for PT/PTAs and OT/OTAs on Electrotherapy over Acupoints for Stroke Recovery is part of a series of Accelerated Clinical Practice courses. Through a combination of lecture and lab demonstrations, this course provides the individual attention necessary to achieve proficiency in the use and safe application of electrotherapy over acupoints to address post-stroke complications, such as spasticity and shoulder pain, for improved function and ADLs.

Course Objectives

Upon completion of this course, the participant will be able to:

- Describe acupoints, including location and treatment approaches
- Examine research on electroacupuncture (EA) mechanisms of action and using EA for post-stroke complications
- Identify the most commonly used acupoints when addressing post-stroke complications
- Demonstrate correct application of electrotherapy over acupoints in both upper and lower extremities.

Audience, Educational Level, and Reference Materials

Physical therapists, physical therapist assistants, occupational therapists, occupational therapy assistants, and other rehabilitation professionals licensed to prescribe or use biophysical agents. Less than 50% of the contents of this course deals with evaluation and therefore this course is open to PTA and OTA. There may be certain activities instructed that by law cannot be performed by the PTA/OTA. This intermediate course involves extensive lab demonstrations. Individual handouts include printed and digital materials and illustrations that parallel the PowerPoint™ and lab presentations.

Continuing Education Units (CEUs)

ACP's Electrotherapy over Acupoints for Stroke Recovery qualifies for 1.0 clock hour of continuing education by many professional organizations, state associations, and state licensing boards. For a listing of approved provider numbers refer to the CE Approval Form.

Electrotherapy over Acupoints for Stroke Recovery Webinar

When: Wednesday, November 4, 2026, 5:00pm - 6:00pm CST
Where: Microsoft Teams
We are excited to share a free continuing education opportunity for HCA Healthcare physical and occupational therapy clinicians, presented in partnership with Accelerated Care Plus (ACP). This intermediate-level course is approved for 1.0 continuing education contact hour.
Description: The course will explore the evidence and clinical application of electrotherapy over acupoints to address post-stroke complications, including spasticity and shoulder pain, with the goal of improving function and activities of daily living. The course will include lecture and practical lab demonstrations.
Objectives: At the end of the program, the participants will be able to:
1. Describe acupoints, including their locations and treatment approaches.
2. Examine research on electroacupuncture mechanisms of action and its use for post-stroke complications.
3. Identify commonly used acupoints for addressing post-stroke complications.
4. Describe the correct application of electrotherapy over acupoints in the upper and lower extremities.
