Neonatology: Interventions at Birth

To note interventions performed at birth, Neonatologists who attend deliveries have new interventions to document Infant Resuscitation within the Delivery section of their note.

“Interventions at birth” has been revised to be more specific. This new query will be added to Neonatology and Newborn provider notes.

Expanse Order Enhancements

SPONTANEOUS BREATHING TRIAL

(Category Change ONLY)

Changes go in effect **Nov 19, 2025**

The Spontaneous Breathing Trial order (SPONBRETRI.C.OM) is in the OM Category of "Nursing". For this order, the Respiratory Therapy team assesses ability to breathe with minimal or no vent support. RT documents the findings in the "RT Ventilator Weaning" intervention (12205611). Since this order is under the Category of "Nursing", it currently does not notify RT of the new order. It will be changed to the Category of "Respiratory OM", to correct the issue. NO OTHER CHANGES to this order. These changes were made in collaboration with the Corporate RT and Provider Product teams.

These changes will apply to status boards for: Inpatient Nurses, Case Managers, PCTs, Unit Secretaries, PT/OT/SLP/RT, Dietitians, and Infection Prevention.

MEDITECH Expanse TIP SHEET

Updates to Nursing Status Boards

As part of ongoing efforts to improve the visibility of meaningful data, updates will be made to the inpatient nurse, the women's and children's, and inpatient rehab nurse status boards. Four fields will be removed from these boards. The changes are being implemented due to low utilization of these fields, as well as the information being found elsewhere in the chart.

The 'conf' flag will also continue to display in the reference region of the patient's chart.

The screenshot displays a patient chart interface. The top navigation bar includes tabs for Diagnostics, Provider Notes, Nurse/Allied Health, and Medications. Below this, a 'Summary' section lists various data points, many of which are currently empty. A detailed patient information card is overlaid on the right side of the chart.

Patient Information Card:

- Name:** (Jim) He/Him/His
- Test:** Jimmy
- PCS:** 75, M - 01/01/1950
- MRN #:** A242
- ADM IN:** (T) H.ORM
- Acc#:** H4421
- Resus Status:** Not Ordered
- Resus Status:** No Hx Avail
- Conf:** (Status)

If the patient has a documented preferred name, pronouns, or temporary location, these will also remain visible in the reference region of their chart.
