Ongoing Competencies

Safe Procedural and Surgical Verification

Description: This continuing education activity is designed to meet the learning needs of physicians, nurses, and other healthcare professionals who participate in surgical or invasive procedures.
Objectives: At the completion of the educational activity, the clinician will be able to:
1. Define the actions that must be taken by each member of the surgical team to eliminate wrong site surgeries and invasive procedures.
2. Describe how members of a surgical or procedural team should actively participate in the Time-Out and site verification processes.
3. Reconcile concerns raised by members of the surgical team during the Time-Out and site marking processes prior to the start of an invasive procedure or surgery.
Note: The Safe Procedural and Surgical Verification educational activity is accessible in HealthStream October 27, 2026, through October 27, 2029.
